

FOR IMMEDIATE RELEASE

February 19, 2015

RACINE, WISCONSIN

Joseph E. Sabol organized *Visualization Insights from Big Data: Envisioning Science, Engineering, and Innovation* at the American Association for the Advancement of Science (AAAS) Annual Meeting in San Jose CA, February 12-16, 2015. Session co-organizer was Katy Borner, Indiana University and the presentation topics included exploring chemical space for new energy materials, visual insights for science policy making, and the art of visualizing big data. <https://aaas.confex.com/aaas/2015/webprogram/Session9437.html>

The meeting theme was *Innovations, Information, and Imaging*: science and technology are being transformed by new ways to collect and use information; progress in all fields is increasingly driven by the ability to organize, visualize, and analyze data.

More than 3,500 science professionals attended the meeting, which held more than 140 sessions.

AAAS was founded in 1848, has headquarters in Washington DC, and currently has more than 120,00 members world-wide. See www.aaas.org/ for more information.

Sabol is a principal-consultant to the chemical and related industries, with expertise in chemical R&D and technology, market research, and business development, and has offices in

Racine WI and Marquette MI.
